Research objectives

- To measure tram passenger journey satisfaction for six tram networks in Britain:
 - Blackpool
 - Edinburgh Trams
 - Manchester Metrolink – not including the Airport line which opened in November 2014
 - Midland Metro (Birmingham/Wolverhampton)
 - Nottingham Express Transit (NET)
 - Sheffield Supertram.
- To provide cross-modal comparisons where possible with bus and train journeys as measured in our Bus and National Rail Passenger Surveys (BPS and NRPS)
- To explore barriers to tram use, opportunities to encourage usage, and potential improvements to the passenger experience

This is the report for the Manchester Metrolink tram system, with relevant comparative data for bus and train for the Transport for Greater Manchester area.

Methodology – fieldwork

Tram Passenger Survey 2014 – Manchester Metrolink

Manchester Metrolink (TPS)

Fieldwork: 10 September to 27 November 2014

Interviewer shifts: covered all days of the week and ran from 6am to 10pm. Each interviewer worked a three-hour shift

Method: Choice of paper or online self-completion questionnaire

Sample size: 2,824 interviews (1,753 paper and 1,071 online)

In 2013 fieldwork took place between 28 October and 15 December

Bus (BPS) data for Transport for Greater Manchester area

Fieldwork: 10 September to 30 November 2014

Interviewer shifts: covered all days of the week and ran from 6am to 10pm. Each interviewer worked a three-hour shift

Method: Self-completion paper questionnaire

Sample size: 2,133 interviews

Train (NRPS) data for Transport for Greater Manchester area

Fieldwork: 1 September to 9 November 2014

Interviewer shifts: covered all days of the week and ran from 6am to 10pm. Each interviewer worked a three-hour shift

Method: Self-completion paper questionnaire

Sample size: 1,139 interviews

Note: the passenger journeys included for TfGM NRPS data in this report use a broader definition than that used in the main NRPS. All Journeys have either a start or end point within the Greater Manchester area. The opposite end of the journey must either be within Greater Manchester or the wider Travel to Work area.

This produces a greater sample size for more reliable cross-modal comparisons. 121 stations are covered in total.

Methodology – data analysis

Tram Passenger Survey 2014 – Manchester Metrolink

Base definitions: All charts are based on those who gave an answer to an individual question. Those who either left the question blank or said ‘don’t know’ have been excluded from the base. For this reason the base sizes for those charts based on ‘all passengers’ vary slightly between the different charts in this report.

Weighting: this was based on passenger count information collected by the interviewer during each interviewer shift. The weighting matrix used the following weighting cells:

- Tram network (for Manchester Metrolink this was by line)
- Age: 16-25, 26-59, 60+
- Gender: male, female
- Time/day travelled: weekday peak, weekday off peak and weekend

The full details of the weighting matrix can be found in the TPS Autumn 2014 technical report.

The Manchester Metrolink system

Tram Passenger Survey 2014 – Manchester Metrolink

- At the time the research was undertaken, Metrolink consisted of six lines with 76 stops in total, running 47.7 miles throughout the Greater Manchester area. (Please see network map on following page)
- The Airport line opened in November 2014 and was not included in the research
- Approximately 29.2 million* passenger journeys were made in 2013/14
- There are no conductors on board; tickets can be purchased from ticket vending machines at tram stops
- All Metrolink stops have information boards with timetables and fare information. City Centre stops and the Ashton, East Didsbury, Eccles and Rochdale lines have Passenger Information Displays
- Tram frequency is as follows:

Monday - Saturday	
Altrincham line	Every 6 mins
Ashton line	Every 12 mins
Bury line	Every 6 mins
East Didsbury line	Every 12 mins
Eccles line †	Every 12 mins
Rochdale line	Every 12 mins

Sunday (all lines)	
Morning/evening	Every 15 mins
Daytime	Every 12 mins

† Additional trams every 12 mins from Media City

- During busy periods two trams may be coupled together (as a 'double tram') to increase passenger capacity. In 2014 new trams were added to the fleet, including more double trams. This may explain some of the significant differences shown in this report

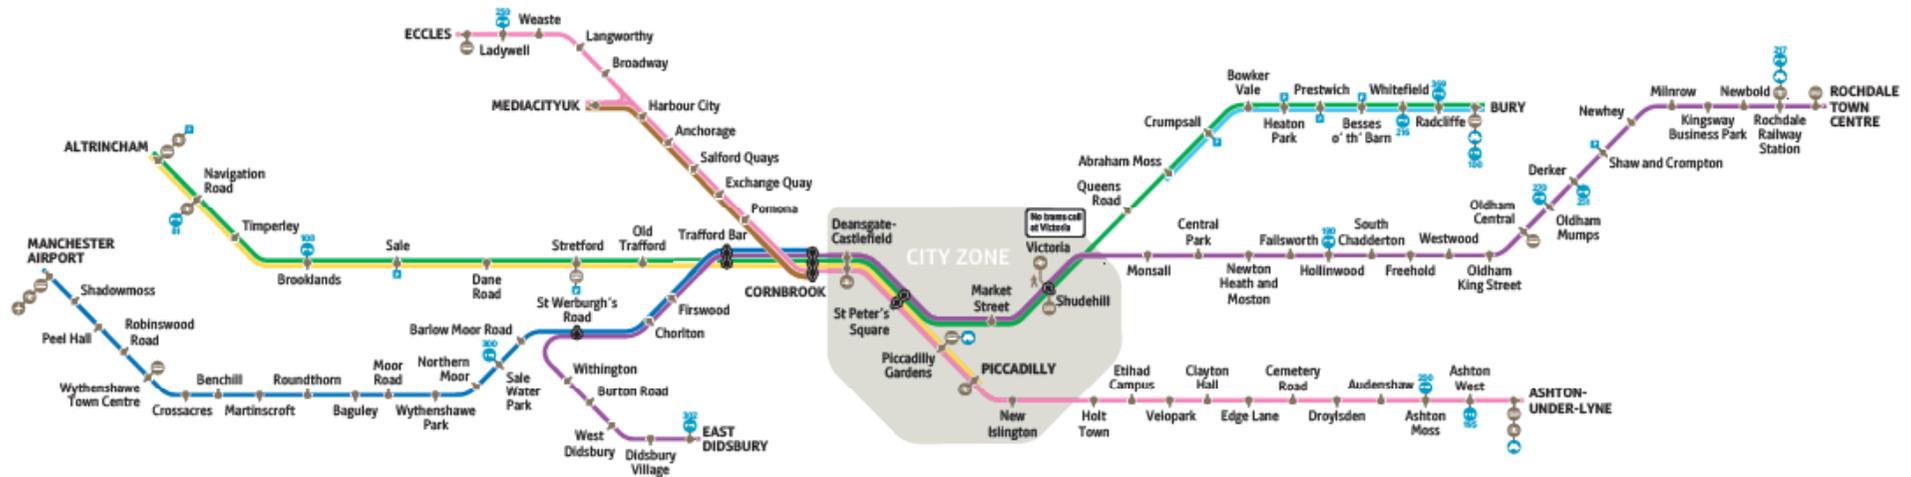

Fieldwork note:

- On-going engineering works ran through the fieldwork period. Fieldwork shifts were scheduled to avoid major tram network improvement works and large sporting events
- 1 shift on the Rochdale line was disrupted by a points failure on 6th November. This was rescheduled

Tram Passenger Survey (TPS) 2014 – Manchester Metrolink

Summary

Summary of key findings (1)

Tram Passenger Survey 2014 – Manchester Metrolink

- 85 per cent of Metrolink passengers were satisfied with their journey overall (2013: 83 per cent). This is identical to the same measure on the Bus Passenger Survey (85 per cent) and significantly higher than the National Rail Passenger Survey (69 per cent) in the Transport for Greater Manchester area
- Overall satisfaction with journeys on Metrolink has increased significantly amongst commuters and older age groups (35-59 and 60+) since 2013
- Amongst fare paying passengers less than half (48 per cent) were satisfied with the value for money of their journey (2013: 47 per cent). This compares to 73 per cent of bus passengers and 45 per cent of rail passengers in the Transport for Greater Manchester area
- When evaluating value for money the joint most important factors to passengers were the cost of the tram versus other modes of transport and the cost for the distance travelled
- The main factor that drives passengers to be very satisfied on Metrolink is satisfaction with the amount of time the journey took, followed closely by punctuality of trams. 81 per cent of passengers were satisfied with journey time (2013: 80 per cent) and 78 per cent were satisfied with punctuality (75 per cent).

Summary of key findings (2)

Tram Passenger Survey 2014 – Manchester Metrolink

- The best performing section of the Metrolink network is the Ashton line, with 90 per cent overall journey satisfaction and the highest passenger satisfaction levels on three other key measures. The Rochdale line has the lowest level of overall satisfaction (80 per cent) and the Bury line has the lowest levels of passenger satisfaction on four other key factors
- 44 per cent of passengers spontaneously mentioned improvements that could be made to Metrolink, which is significantly less than 2013 (51 per cent). The most mentioned was improvements to tram stops. Other factors mentioned related to the space on board trams (e.g. bigger or longer trams and more seating on board)
- Only 8 per cent experienced anti-social behaviour while travelling on Metrolink. Rowdy behaviour of other passengers was the greatest cause for concern
- The profile of passengers on Metrolink is relatively young, with 35 per cent aged 16-25
- 56 percent of passengers use Metrolink for commuting reasons: 48 per cent are commuting for work and 8 per cent for education
- As the profile of Metrolink passengers is quite young only one in ten (12 per cent) were travelling with a 60+ concessionary pass. This compares to 18 per cent on buses.

Key factors that drive tram passengers to be very satisfied (%)

Tram Passenger Survey 2014 – Manchester Metrolink

Key drivers of satisfaction

Key drivers that drive passengers to be very satisfied

The key driver analysis uses Multiple Linear Regression and is performed in two stages. First, the drivers of satisfaction are identified. Satisfied passengers are defined as those who are either very or fairly satisfied with their journey. Once the drivers of satisfaction have been determined, the non-satisfied (very dissatisfied, fairly dissatisfied and neither/nor respondents) are removed, and a new regression analysis is run to determine which factors drive people to be very satisfied (rather than fairly or very satisfied). The key drivers displayed above are those that drive passengers to be very satisfied. In order to increase robustness the analysis combines data from 2013 and 2014. Please refer to the TPS technical report for a full explanation.

Base: All fare paying passengers - 4182 (2013 and 2014)

Experience of delays (%)

Suggested improvements to the Manchester Metrolink service – passenger verbatims

Tram Passenger Survey 2014 – Manchester Metrolink

I find it absolutely absurd that you don't publish timetables for the trams. It's fine to say 'it is a regular, frequent service' if that is indeed the case but as you know it isn't, trams from East Didsbury go something like every 14 minutes, if you miss one through not knowing, you have to wait 13 minutes for the next one which I consider to be an incredibly long time to wait for a tram

More carriages to accommodate the number of passengers travelling during rush hour

Speed to destination – too many stops close together on the Eccles line at Salford Quays

Slightly more frequent trams and connections would be better - I wait for up to 15 minutes to make a connection at Cornbrook usually, whereas I can drive all the way to work in under 15 minutes by car

Needs two ticket machines at the Heaton Park station per platform. The tap and scan way of paying by card would be faster too

More comfortable seat for tall people and WiFi

Greater frequency of service or advertised schedule of specific tram times. Just turning up and hoping you haven't just missed one and have a 12 minute wait is quite inconvenient

More information at tram stops

Journey was fine on this occasion, however I was lucky to get a seat that day. Many times I do have to stand and feel claustrophobic as the tram can get very full during rush hour if there is even a delay of a few minutes. Also passengers on the platform can get rowdy

I think that the single fare is extortionate, £3.60, when it is only £3.80 return is scandalous

The ability to sit down for the entirety of the journey, although I appreciate that this was at peak time for commuters into the city centre

More comfortable seats (not much cushioning on the seat)

Fare is very high. Makes the car a good option, even considering parking charges

Trams should be more frequent during morning and evening rush hour. And there is a lack of information on live metro arrivals on your website. It is not possible to arrange to meet friends for want of further knowledge
