Survey approach

The survey has been carried out using our established Bus Passenger Survey methodology and is designed to be representative by bus passenger journeys made.

Bus services sampled are chosen from a list those bus services and running times available through Traveline. Chosen services form the start point for a three-hour shift, during which field workers made as many return trips as possible on that selected service. They discuss the survey with the boarders of that bus service and give all passengers the chance to participate; those wishing to do so were given a self-completion questionnaire to complete after their journey, together with a reply-paid envelope.

Fieldwork was conducted between mid March 2014 and mid May 2014 (excluding the Easter school holiday period). Services available for selection were those running between 6am to 10pm, seven days of the week; only school bus services were systematically excluded. The survey was conducted among passengers aged 16 or over.

Weighting was applied to offset the effect of differential response rates by age and gender. Weighting was also applied to each bus company's results within the Go-Ahead Group so that the Go-Ahead Group level figures are representative by passenger journeys made on their routes within England outside of London.
