Outline of methodology

The survey has been carried out using our established Bus Passenger Survey methodology. This survey programme has measured bus passengers' experiences on bus routes across all of Go-Ahead's bus companies within our remit area, i.e. England outside of London. This report outlines the results for Konectbus bus services.

Passenger Focus appointed GfK NOP Ltd to provide the agency support required on the survey.

The Bus Passenger Survey is designed to measure passengers' experiences of bus travel, and to be representative by bus passenger journeys made. Passenger opinion was collected via a self-completion questionnaire. Passengers were asked to rate the journey they had just experienced. The sampling process used is summarised below (further detail is in the methodology document on our website):

- A database of all Konectbus's services was sourced from ITO World, which collects and makes available the bus journey data shown by Traveline. Every timetabled journey for every Konectbus bus route was listed (except school bus services) and ascribed a value which took into account an adjustment for passenger turnover on longer routes.
- That list of routes was then stacked and sorted by day of week, time, and route. The sample was selected using systematic sampling, picking every n^{th} event based on the cumulative value attributed to each route within the sorted list (n being the number of shifts required). Each of the n services selected formed the start time for each shift.

Field workers made as many return trips feasible during their 3 hour shift on the routes selected. They discussed the survey, inviting all passengers who boarded those services the chance to participate. Passengers wishing to participate were given a questionnaire to complete after their journey, together with a reply paid envelope. Fieldwork was conducted between the middle of March and the middle of May 2012 (excluding the Easter school holiday period).

Weighting was applied to offset the effect of differential response rates by age and gender. Weighting was also applied to each bus company's results within the Go-Ahead Group so that the Go-Ahead Group level figures are representative by passenger journeys made on their routes within England outside of London.

In the report: All results are based on weighted values. The numbers in brackets shown after question/category texts are the actual numbers of responses generating the answer value shown. Where there is less than 75 responses, the result is not shown.
