

# Rail Passenger Satisfaction at a glance: First Hull Trains - Autumn 2015

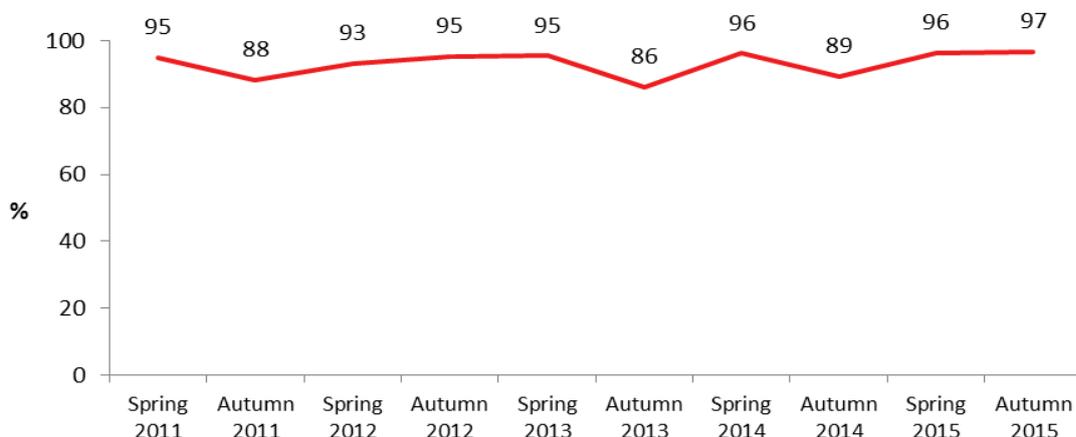

Transport Focus is the independent transport-user watchdog. Our mission is to get the best deal for transport users. In spring and autumn we carry out the National Rail Passenger Survey (NRPS), a network-wide picture of passengers' satisfaction with rail travel in Great Britain.

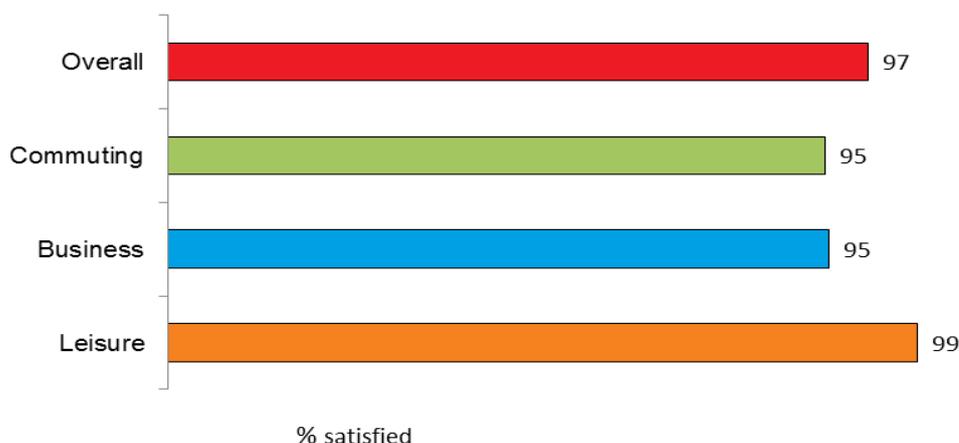

We ask passengers for their views of the specific journey they are making at the point they are surveyed, both in general and on a number of specific areas regarding the station, the train and the service received.

For First Hull Trains this time we spoke to 576 passengers. This page shows the headlines. Page 2 shows satisfaction with individual aspects of the station and the train. Page 3 looks at some factors in a bit more depth. The last page shows which factors have the biggest effect on satisfaction and dissatisfaction.

## What impacts on satisfaction and dissatisfaction?

Not all factors will have equal importance - some things will have a much bigger influence on whether a passenger is satisfied with the overall journey than others.

The charts below show which station and train factors are statistically most important in determining overall passenger satisfaction and dissatisfaction.

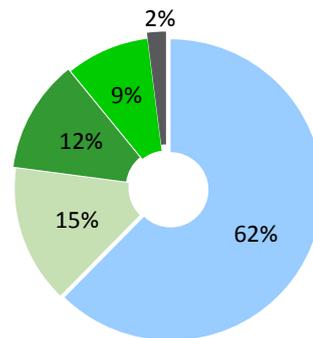

The analysis looks at which factors correlate most highly with overall journey satisfaction. For example, if those satisfied with punctuality are much more likely to be satisfied overall, then punctuality is likely to have a bigger impact on overall satisfaction. The higher the percentage figure below, the greater the influence on overall journey satisfaction.

### What has the biggest impact on overall satisfaction?

- Cleanliness inside the train
- Punctuality/reliability
- Comfort of the seating area
- Upkeep and repair of the train
