## 1 Introduction

- 1.1 Methodology 2
- 1.2 Issues affecting fieldwork 3

## 2 Key results

- 2.1 Overall satisfaction and station factor results for First Great Western 5
- 2.2 Train factor results for First Great Western 7
- 2.3 Overall satisfaction and station factor results for London and South East 9
- 2.4 Train factor results for London and South East 11
- 2.5 First Great Western versus London and South East performance 13
- 2.6 Results by route for First Great Western 14

## 3 Passenger satisfaction trend charts

- 3.1 Overall satisfaction and station factor results for First Great Western 15
- 3.2 Train factor results for First Great Western 21

## 4 Managed versus non-managed stations

- 4.1 Network Rail categorisation and station factor results for First Great Western 28

## 5 Peak/off-peak satisfaction

- 5.1 Peak/off peak satisfaction for First Great Western 29
- 5.2 Peak/off peak satisfaction for London and South East 30

## 6 Passenger experience with service

- 6.1 Passenger experience of delays 31
- 6.2 Passenger experience relating to disability 32

## 7 Sample profile

- 7.1 Sample profile for First Great Western versus London and South East 33
- 7.2 Station sample sizes for First Great Western 35
- 7.3 Weighted sample composition for all TOCs 36
- 7.4 Unweighted sample composition for all TOCs 37

## 8 Technical appendix

- 8.1 Standard reports produced for NRPS 38
- 8.2 Rail sectors 39
- 8.3 How routes are defined 40

Questionnaires are normally handed out at stations to customers about to board a train. A reply paid envelope is provided for returning questionnaires.

Each Train Operating Company (TOC) is sampled separately. Interviewers are given a number of questionnaires to hand out at a station. At Gatwick and Heathrow Airports and for some shifts at certain London termini, questionnaires are handed out to passengers of a specific TOC.

From Autumn 2003 onwards, at all other stations, questionnaires are handed out to passengers of any TOC (in the past, these were also targeted). The number of questionnaires handed out will depend on:

- the size of station
- time of day
- length of shift

TOC data is compiled to provide a national sample. Fieldwork is carried out each Spring (February/March) and Autumn (September/October). Up to Spring 2003, fieldwork took place over 3 weeks.

In Autumn 2003, the fieldwork was extended to an 11 week period, from 26 August to 9 November, to provide a better representation of journeys.

Quotas for returned questionnaires are set overall and by weekday/weekend, journey purpose and station size. All data for a TOC in this Report is weighted up to the number of passenger journeys annually on the TOC and the profile of those journeys by:

- weekday/weekend
- journey purpose (Commuter, Business, Leisure)
- station size (this profile is applied for each TOC building block)

The data for number of journeys and profiles by these variables was generated from ORR data (2012).

The stations for each TOC were stratified by number of passengers and a number of stations in each size stratum is sampled. This sample design and weighting ensures that data is representative of all passenger journeys made on each TOC. National results are constructed by combining data for all TOCs together, weighting by number of journeys.

From Autumn 2007 standard region definitions have been used replacing older rail regions. Analysis for the old regions is available on request. For more details of NRPS methodology, visit [www.passengerfocus.org.uk](http://www.passengerfocus.org.uk)

### Autumn 2013 (Wave 29)

Fieldwork for Wave 29 was undertaken between 2nd September and 11th November 2013.

First Hull Trains results have probably been affected by engineering works and a major power failure on the East Coast mainline during weekend fieldwork.

Results for Southern may have been affected by several incidents, in particular four separate fatalities and a major trespass incident on the Brighton mainline.

As with previous waves, planned and unplanned engineering works/problems meant that some shifts were also rescheduled (this particularly affected shifts during weekends). As usual, shifts were only rescheduled if the engineering work caused a station or line closure. Whenever possible the shifts went ahead as planned if there were still train services running.

### Spring 2013 (Wave 28)

Fieldwork for Wave 28 was undertaken between 12th January and 24th March 2013.

A number of shifts were affected by the severe weather early in the fieldwork period. Both train services and fieldworker transport were disrupted resulting in a number of shifts being rescheduled.

As with previous waves, planned engineering works meant that some shifts were also rescheduled. As usual, shifts were only rescheduled if the engineering work caused a station or line closure. Whenever possible the shifts went ahead as planned if there were still train services running.

### Autumn 2012 (Wave 27)

Fieldwork for Wave 27 was undertaken between 1st September and 12th November 2012. Top up shifts were run within the last 3 weeks of fieldwork.

Due to a Network Rail ban on all fieldwork during the Paralympics, NRPS shifts at Network Rail Stations started on 10th September.

To ensure the data did not potentially include data where respondents answers were possibly biased, a small number of shifts affected by the distribution of gift bags by station staff to respondents with questionnaires were removed from the database and the shifts affected were then replaced.

As with previous waves, planned engineering works meant that some shifts were rescheduled. As usual, shifts were only rescheduled if the engineering work caused a station or line closure. Whenever possible the shifts went ahead as planned if there were still train services running.

### Spring 2012 (Wave 26)

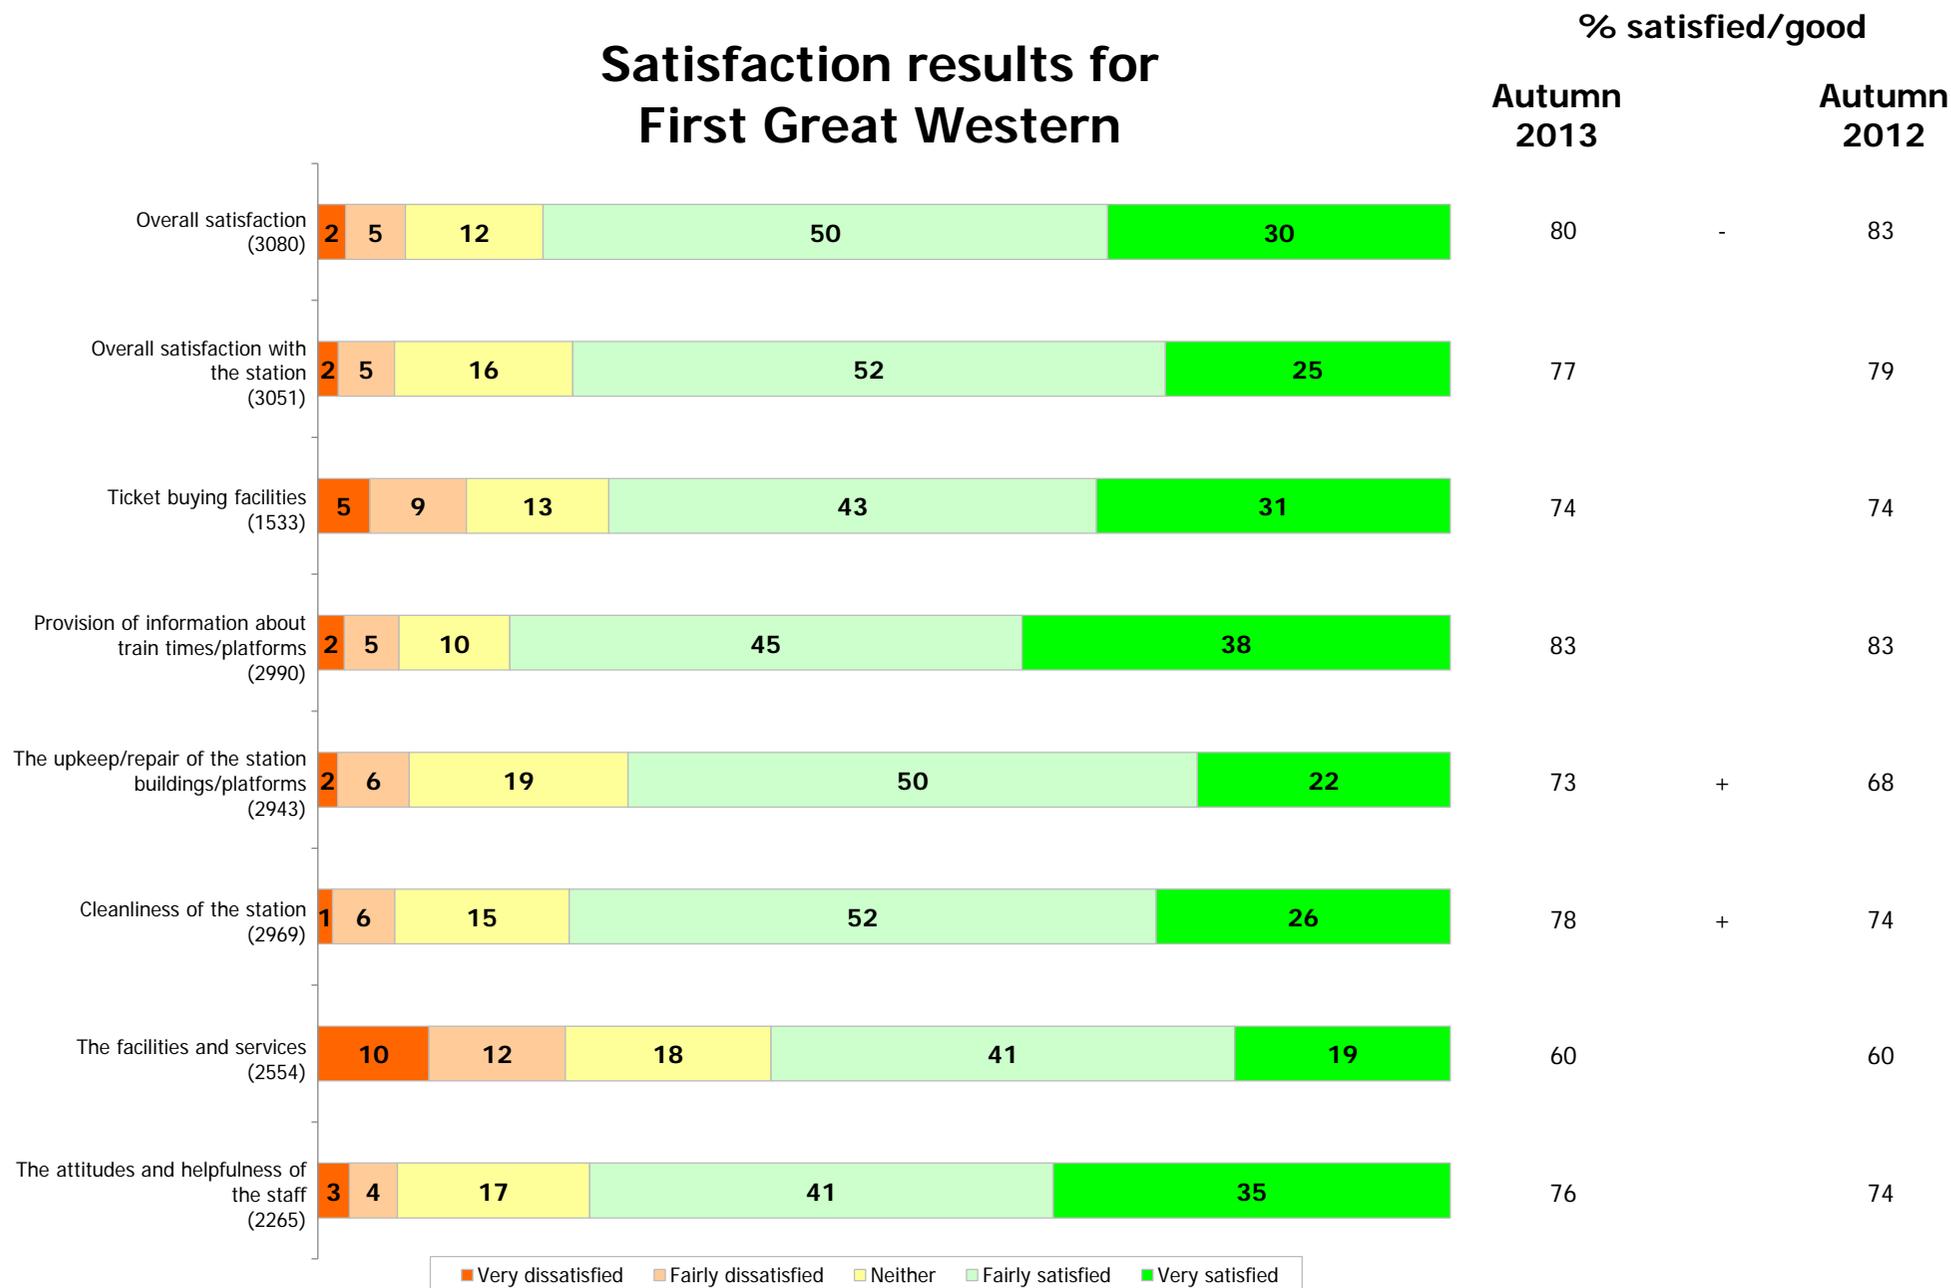

The fieldwork for Wave 26 (Main and Boost) was undertaken between 28th January and 30th March 2012. Top up shifts were run within the last 3 weeks of fieldwork.

Due to a change of franchise holder, the 'National Express East Anglia' train company became 'Greater Anglia' on 5th February 2012. Fieldwork and distribution of questionnaires for this train company started a week later than others on 5th February as we waited for this change to take place.

In the latter stages of fieldwork we were refused permission to work on a small number of shifts. This meant the rescheduling of a few shifts but ultimately they were all done by the 30th March.

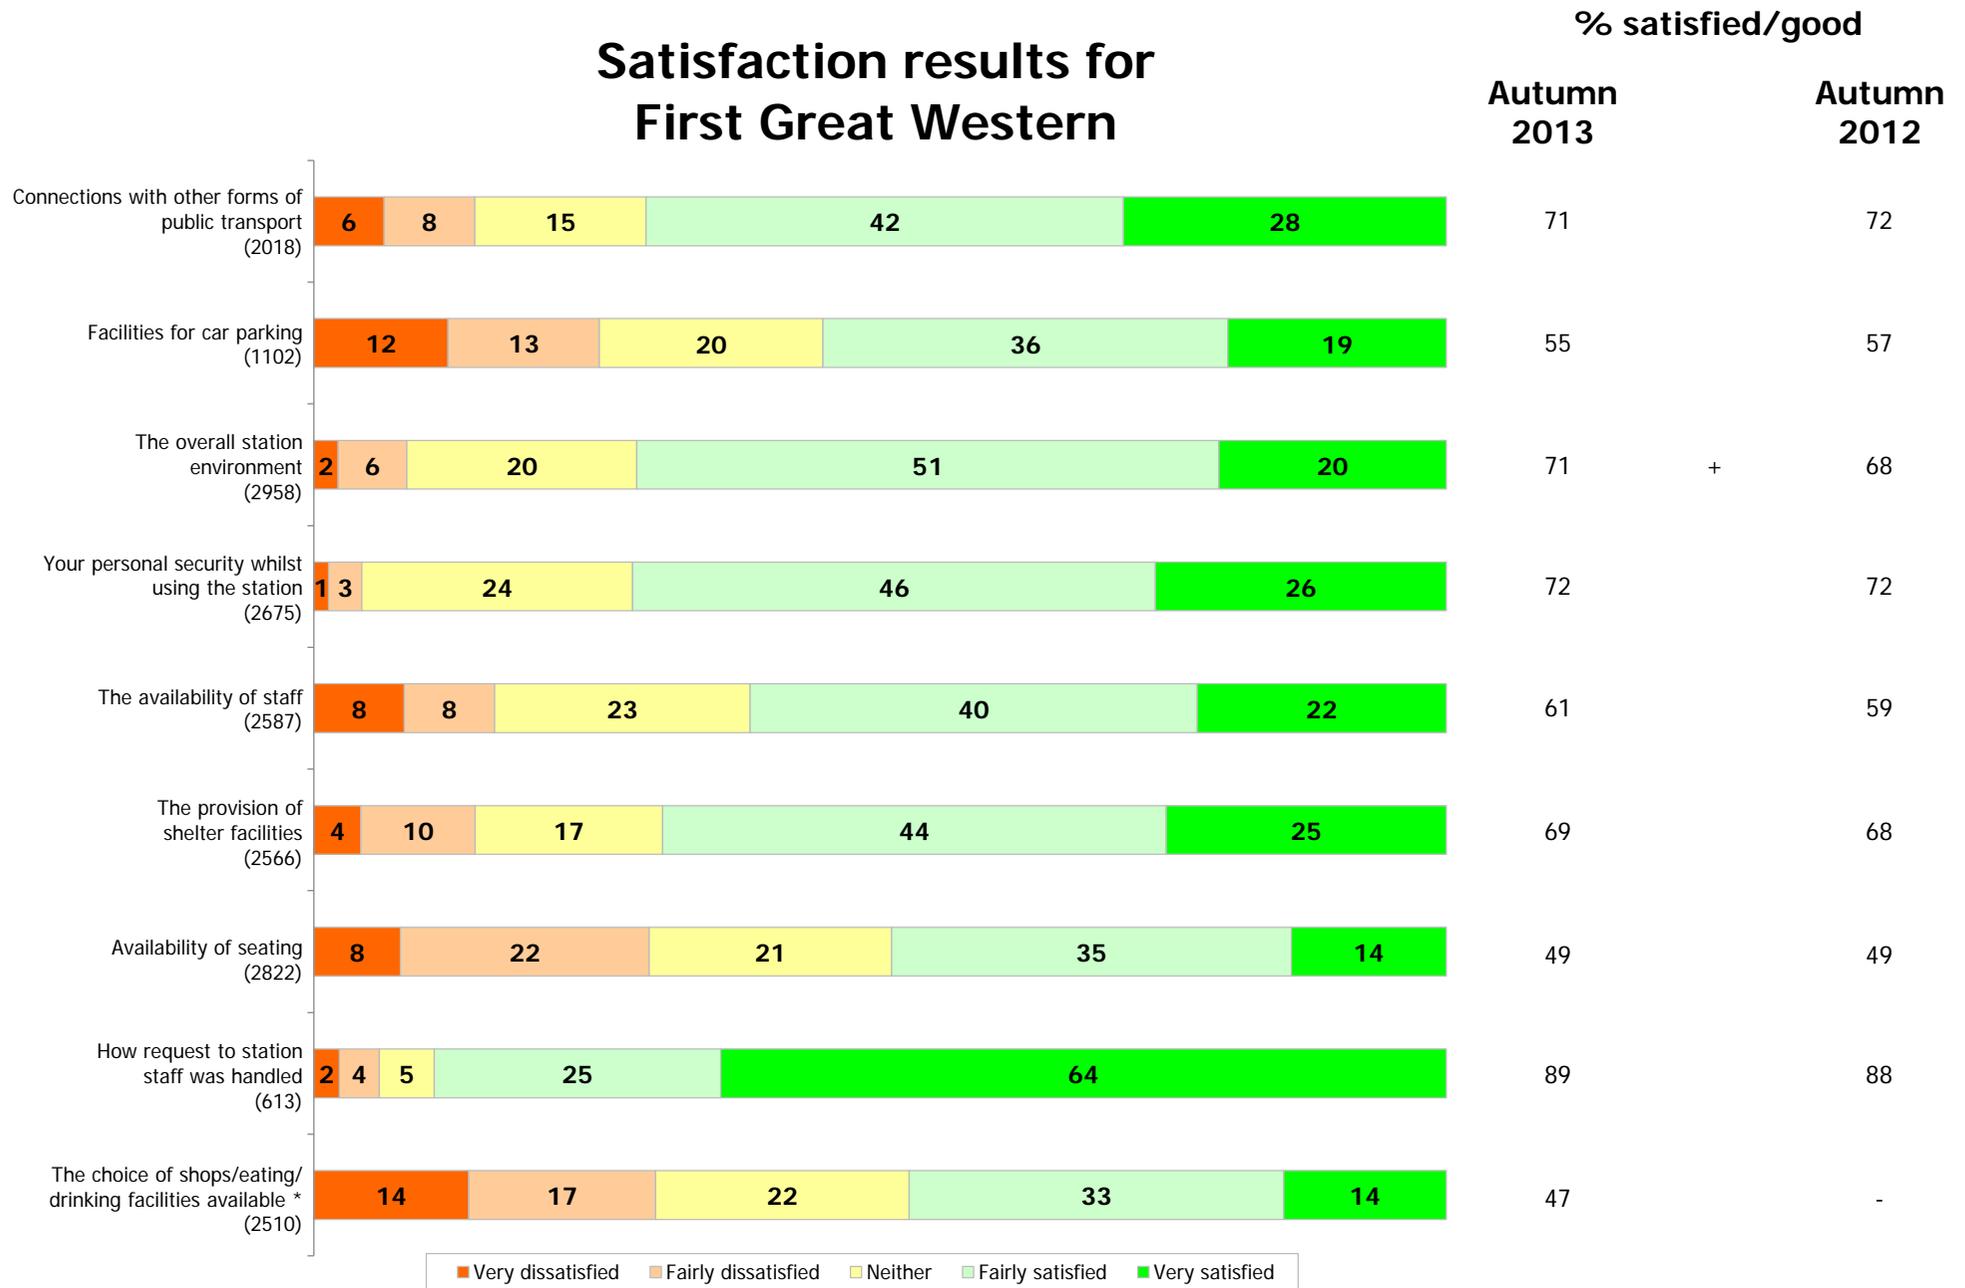

As with previous waves, planned engineering works meant that some shifts were rescheduled. As usual, shifts were only rescheduled if the engineering work caused a station or line closure. Whenever possible the shifts went ahead as planned if there were still train services running.
