### \*What is a thematic champion?

The thematic champions are individual, or small groups of, board members who have expressed an interest, or already have an expertise, in a topic which is either a current year workplan priority, or a work theme in which we have no choice but to engage with the industry, government or other stakeholders.

Champions work with the lead member of staff on developing policy or responding to a request or consultation. Whilst most of the work is done by the staff member, contributions in the form of advice and suggestions are welcomed particularly during drafting. Depending on the piece of work, advice may be sought immediately, during drafting or at final draft stage.

Some groups of champions may occasionally convene. Other themes may be more or wholly correspondence based. Each theme will be slightly different in terms of its demands and communications. When themes come before the whole board for discussion it is particularly useful to have one or more board members who have developed a deeper understanding of some of the issues and who can support the briefing or case made by the member of staff concerned. The champions remain, however, whether individually or in groups, an **informal arrangement with no delegated authority to make policy or commit resources**.
