

Rail Passenger Satisfaction at a glance: Heathrow Express - Spring 2016

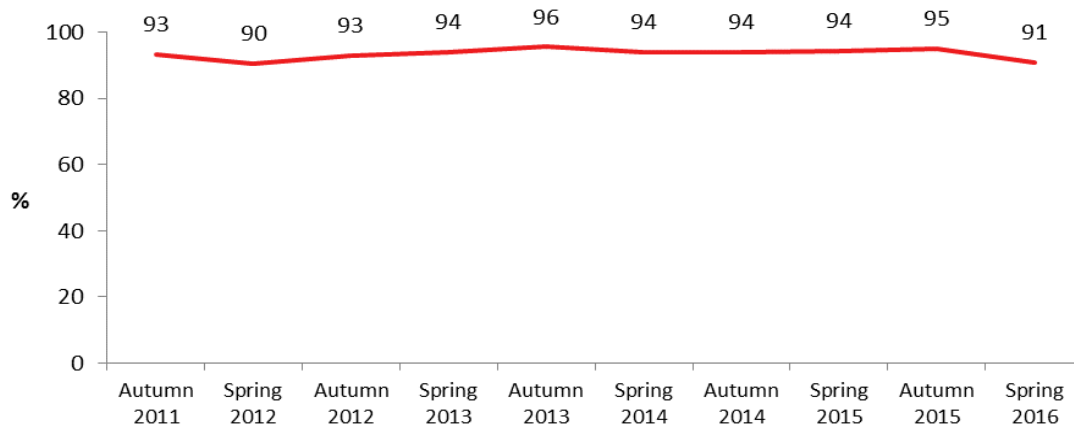

Transport Focus is the independent transport user watchdog. Our mission is to get the best deal for transport users. In spring and autumn we carry out the National Rail Passenger Survey (NRPS), a network-wide picture of passengers' satisfaction with rail travel in Great Britain.

We ask passengers for their views of the specific journey they are making at the point they are surveyed, both in general and on a number of specific areas regarding the station, the train and the service received.

For Heathrow Express this time we spoke to 539 passengers. This page shows the headlines. Page 2 shows satisfaction with individual aspects of the station and the train. Page 3 looks at some factors in a bit more depth. The last page shows the relationship between importance and performance.

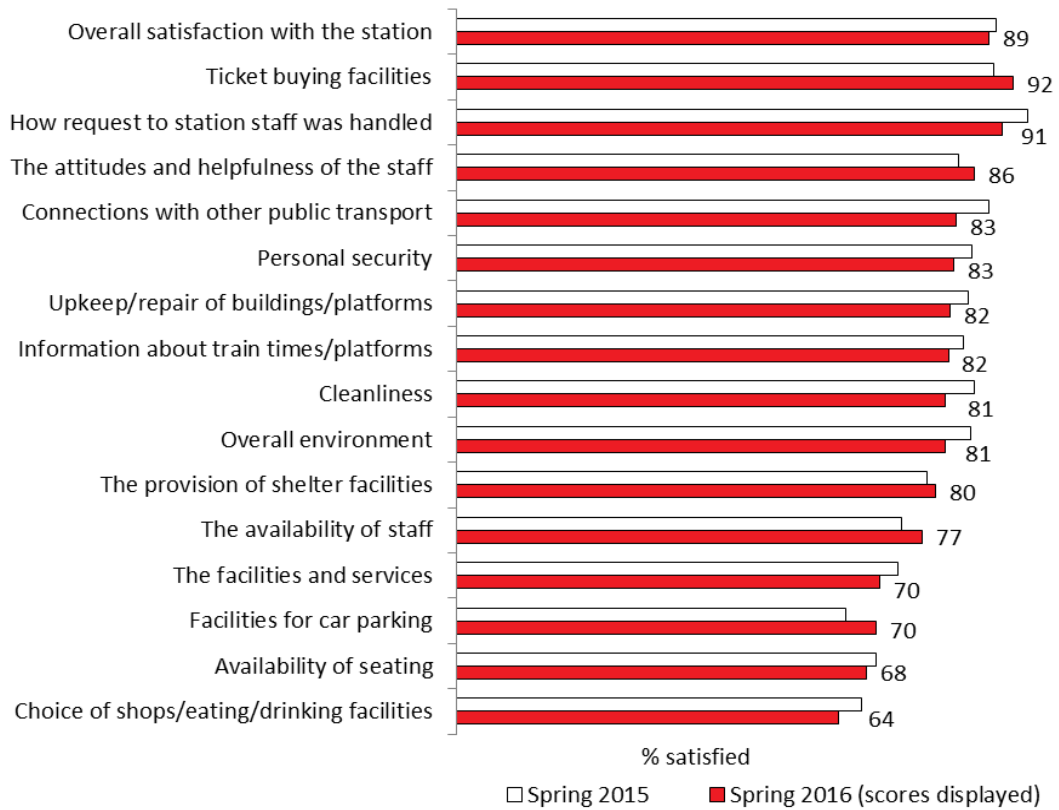

Overall satisfaction with the journey

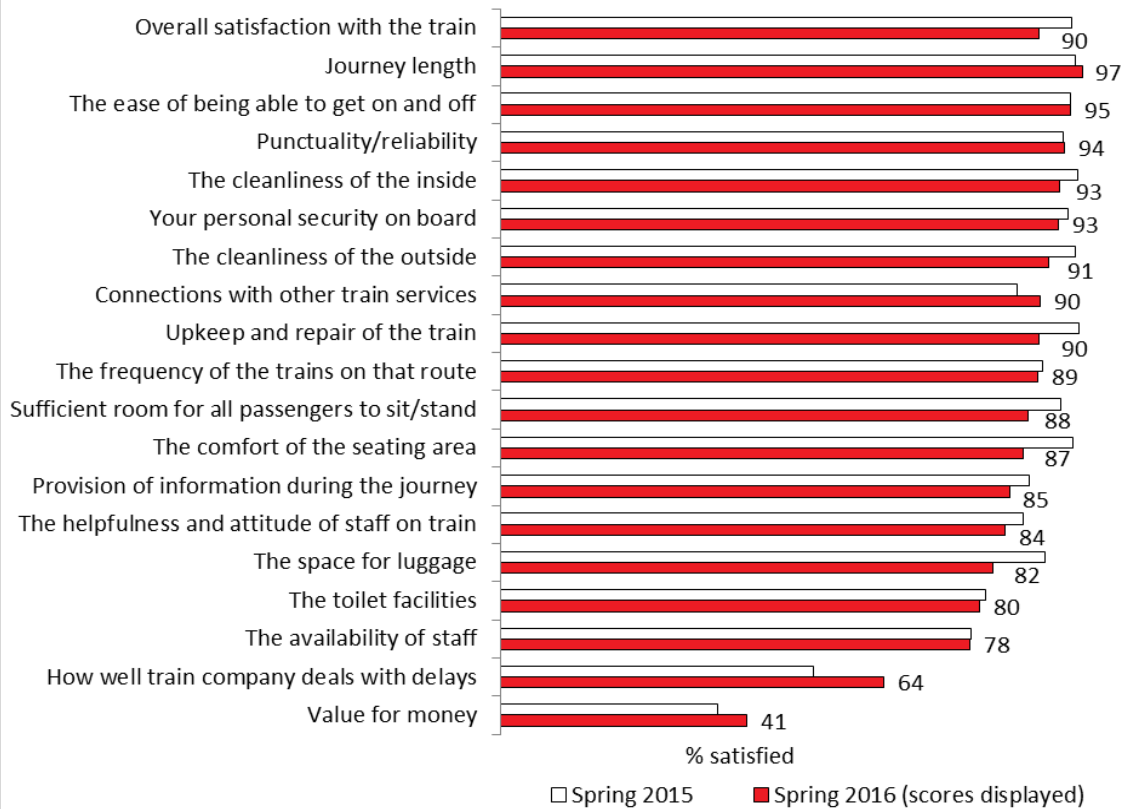

Overall satisfaction by journey purpose

Satisfaction at the station where they boarded

Satisfaction on the train

Satisfaction - in a bit more depth (Spring 2016)

Cleanliness inside the train

% rating as good

Your personal security on board

% rating as good

Personal security at station

% rating as good

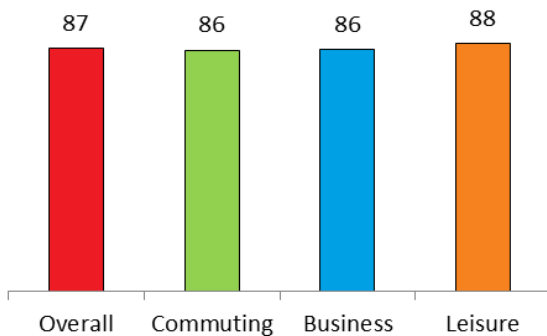

The frequency of the trains on that route

% satisfied

The comfort of the seating area

% rating as good

Value for money

% satisfied

Importance versus performance

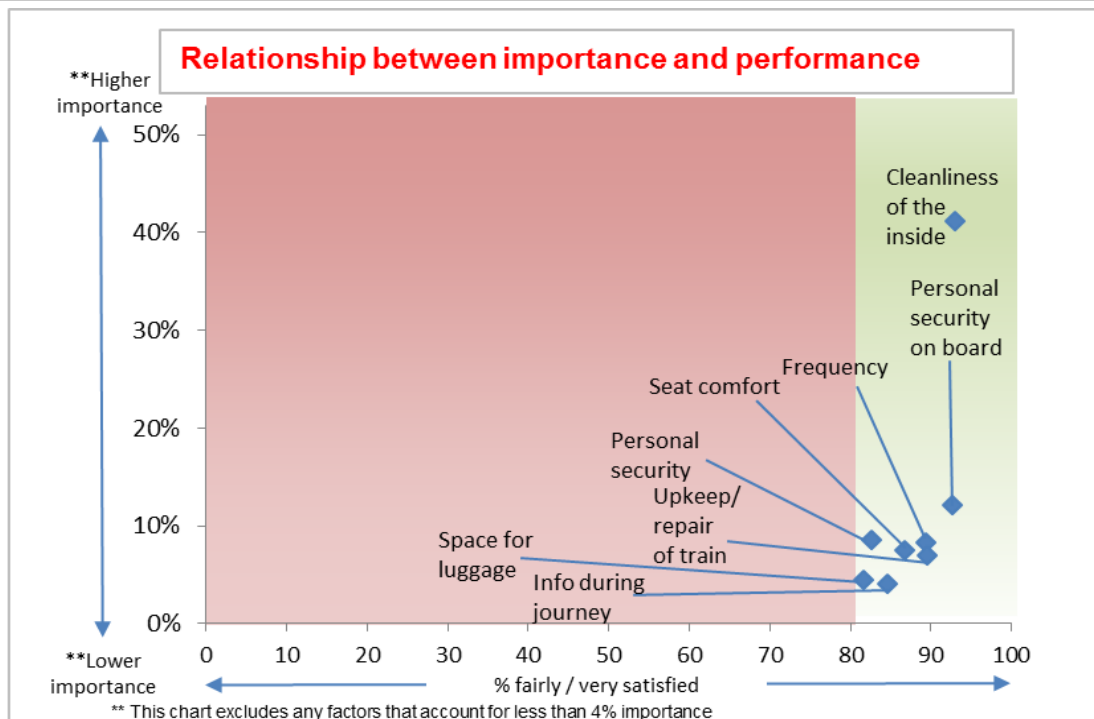

2015-2016

Not all factors asked about in this survey have equal importance - some things will have a much bigger influence on whether a passenger is satisfied with the overall journey than others.

The chart below shows the station and train factors which have a statistically significant relationship with overall journey satisfaction on this TOC - those which are most important in determining overall passenger satisfaction.

The vertical axis shows the relative strength of relationship (or relative importance) of these factors, and the horizontal axis shows how this TOC performs (the percentage of passengers satisfied with each).

Factors appearing towards the top right are those which are very important in driving a good overall journey experience, and on which the service performs quite well. Factors appearing towards the top left are also very important but delivered less well - these are priorities for improvement. Factors towards the bottom left or right are relatively less important, but do still have an impact on overall journey experience.
