

Rail Passenger Satisfaction at a glance: Great Western Railway - Spring 2017

Transport Focus is the independent transport user watchdog. Our mission is to get the best deal for transport users. In spring and autumn we carry out the National Rail Passenger Survey (NRPS), a network-wide picture of passengers' satisfaction with rail travel in Great Britain.

We ask passengers for their views of the specific journey they are making at the point they are surveyed, both in general and on a number of specific areas regarding the station, the train and the service received.

In this survey we spoke to 1502 Great Western Railway passengers. This shows the headline results. Page 2 shows satisfaction with individual aspects of the station and the train. Page 3 looks at some factors in a bit more depth. The last page shows the relationship between importance and performance.

Overall satisfaction with the journey

Overall satisfaction by journey purpose

Overall satisfaction by route

How routes are defined

Long-distance: Journeys on long-distance services

London Thames Valley: Journeys on relatively short-distance services in and around the Thames Valley

West: Journeys on (generally) short-distance rural rail lines in the West of England

Satisfaction at the station where they boarded

Satisfaction on the train

Satisfaction - in a bit more depth (Spring 2017)

Importance versus performance

2016-2017

Not all factors asked about in this survey have equal importance - some things will have a much bigger influence on whether a passenger is satisfied with the overall journey than others.

The chart below shows the station and train factors which have a statistically significant relationship with overall journey satisfaction on this TOC - those which are most important in determining overall passenger satisfaction.

The vertical axis shows the relative strength of relationship (or relative importance) of these factors, and the horizontal axis shows how this TOC performs (the percentage of passengers satisfied with each).

Factors appearing towards the top right are those which are very important in driving a good overall journey experience, and on which the service performs quite well. Factors appearing towards the top left are also very important but delivered less well - these are priorities for improvement. Factors towards the bottom left or right are relatively less important, but do still have an impact on overall journey experience.
