Informed Traveller 'T-12'

The large-scale investment in the Western route is warmly welcome and will bring significant passenger benefits. However, I am becoming increasingly concerned about the impact on passengers of late notice requests for engineering access and consequential non-compliance with Informed Traveller T-12 obligations. As you know, passengers are encouraged to assume that information in journey planners is correct at T-12. If it is not, people will make plans based on incorrect information, potentially causing subsequent inconvenience and implications for welfare, if for example travelling late at night. In some cases the industry is allowing passengers to buy tickets on trains that it knows cannot run, and with no warning. This is not acceptable.

Late access requests

It seems to me that there is a risk that the industry will undo the goodwill built up through well-planned and well-executed possessions as a result of last-minute notification of engineering work, such as the all-line block through Reading on 14 and 15 October. I am aware that GWR sought to make passengers aware of the closure in the handful of days available. However, the simple fact is that people had made plans and paid money in good faith, only to find out later that they were not getting what they paid for.

I also have concerns about the approach GWR has taken to compensation for delays on 14 and 15 October. While welcoming that goodwill gestures are now being made, passengers were initially told that they could not claim because the changes were 'timetabled'. There is an important point of principle, however. The timetable was changed after T-12 – natural justice, let alone consumer rights, suggests that if the product is changed after a promise or purchase has been made, compensation is an entitlement and not a gesture of goodwill.

Christmas timetable delay

I am concerned about how late the timetable for the Christmas period was showing in passenger information systems. This would be disappointing at any time, but is particularly so as many passengers want to plan their festive travel arrangements well in advance. For example, on 9 October the full normal timetable for Wednesday 27 and Thursday 28 December was showing for Paddington to Cardiff journeys - dates on which Paddington station is closed – without any warning that incorrect information was showing. See Screenshot A.

The situation was compounded by GWR's decision to promote availability of Advance tickets for Christmas in a marketing email on 19 October (See Screenshot B) before the timetable was correct in journey planners and before all Advance tickets were on sale. I note that on 21 October the GWR website stated:

"At present, not all train times in online journey planners are correct. This applies to GWR.com and all other train booking websites. It also means that information at stations is incorrect too.

Network Rail are working hard on this, but in the meantime, we won't release our discounted Advance Single fares for travel over the Christmas period just yet.

We expect to be able to do so towards the end of October, but we'll update this page when we have more information."

Journey planner discrepancies

Conflicting advice remains today about the best route from London when Paddington is closed. For Swindon on 27 December, the GWR website advises passengers to go via Waterloo and change at Reading. For Cardiff on the same date, the GWR website advises passengers to go via Waterloo changing variously at Basingstoke for Reading or Salisbury. On both these routings Advance tickets are not available so passengers always pay the higher 'walk up' price. However, National Rail Enquiries and Trainline advise travelling on through trains from Marylebone where Advance tickets are available. See screenshots C, D, E and F. The industry has presumably worked hard to divert trains into Marylebone, and yet GWR's own website is seemingly 'blind' to the existence of these services and their Advance fares, and as a result is charging passengers more to go via Waterloo.

Underground fares

It is disappointing that when passengers seek to buy tickets from Paddington, they are being charged £3 each way for the Underground fare to either Waterloo or Marylebone.

First, I should be grateful for your comments in response to the points I have made in this letter so far. Second, it would be helpful if you would address the following.

I am aware that the Western Route Supervisory Board has been discussing the timescale to achieve Informed Traveller T-12 as a matter of routine. For the record, please would you confirm the date from which you expect passengers will be able to rely on data being correct at 12 weeks out? What are the key steps that Network Rail and GWR intend to take to achieve this?

As well as the fundamental underlying issue that Network Rail must finalise engineering works in sufficient time for train operators to 'bid' timetable changes 18 weeks in advance, two other issues need urgent attention:

- i. when timetable data in the public domain within T-12 is known to be wrong it must either be suppressed or 'flagged' to passengers as wrong. And in our view that must happen 'at source' when it emerges from the System Operator so that it is visible automatically to passengers planning journeys using National Rail Enquires, a train company website or through a third party retailer.
- ii. that GWR's train planning and its marketing/retailing teams do not appear sufficiently joined up. Not just to avoid starting Christmas marketing campaigns before the timetable is finalised and all tickets are on sale, but not joined up sufficiently to 'sense check' that GWR's website is offering passengers the expected journey options. It is presumably not intended to hide Marylebone to Cardiff trains in favour of sending passengers via Salisbury.

I look forward to receiving your reply.

Yours sincerely

Anthony Smith
Chief Executive

Screenshot A

The screenshot shows the National Rail Enquiries website. The main heading is "Train times & tickets". Below this, it specifies the route: "London Paddington [PAD] to Cardiff (All stations)". A search bar shows "London Paddington (PAD) to Cardiff (All stations)". The results show a table of train times and ticket prices. The table has columns for "From", "To", "Arr", "Dep", "Days", and "Status". The first row shows a train from London Paddington (PAD) to Cardiff Central (CDF) on 10/10, with a status of "On time". The ticket price is £44.20. The second row shows a train from London Paddington (PAD) to Cardiff Central (CDF) on 10/10, with a status of "On time". The ticket price is £44.20. The third row shows a train from London Paddington (PAD) to Cardiff Central (CDF) on 10/10, with a status of "On time". The ticket price is £44.20. The fourth row shows a train from London Paddington (PAD) to Cardiff Central (CDF) on 10/10, with a status of "On time". The ticket price is £44.20. The fifth row shows a train from London Paddington (PAD) to Cardiff Central (CDF) on 10/10, with a status of "On time". The ticket price is £44.20. The sixth row shows a train from London Paddington (PAD) to Cardiff Central (CDF) on 10/10, with a status of "On time". The ticket price is £44.20. The seventh row shows a train from London Paddington (PAD) to Cardiff Central (CDF) on 10/10, with a status of "On time". The ticket price is £44.20. The eighth row shows a train from London Paddington (PAD) to Cardiff Central (CDF) on 10/10, with a status of "On time". The ticket price is £44.20. The ninth row shows a train from London Paddington (PAD) to Cardiff Central (CDF) on 10/10, with a status of "On time". The ticket price is £44.20. The tenth row shows a train from London Paddington (PAD) to Cardiff Central (CDF) on 10/10, with a status of "On time". The ticket price is £44.20.

Screenshot B

The screenshot shows a Microsoft Outlook email interface. The email is from "Great Western Railway" with the subject "Book now for an early Christmas gift". The email body contains a promotional message about booking train tickets for Christmas. The message says: "Hi Guy, Christmas 2017 will soon be jingling on its way. To help you get into the Christmas spirit, we've teamed up with National Rail to offer you a special discount on your train tickets. Book up to 11 weeks before you want to travel and you could save up to 50%*. And why not really treat yourself and enjoy the extra comfort of First Class?" The email also includes a "Book now" button.
