Journey satisfaction: rolling three-week data

The charts in this report show the degree to which those making journeys in the seven days prior to responding to the survey are satisfied with various aspects of their experience.

The data shows a three-week rolling average which aggregates the satisfaction scores given for journeys made over the three weeks prior to the fieldwork date indicated. Results show the three week average for each of the last twelve weeks.

The table on the following page describes this aggregation.

The aggregated number of interviews on which each data point is based is shown on tables at the end of this summary report.
