Rail User Survey

Introduction

The Rail User Survey asks a representative sample of people in Great Britain about their experience of travelling by rail in the last seven days.

For those that have used rail, the survey asks their journey purpose and how satisfied they were with the overall journey and with aspects such as value for money, punctuality and cleanliness.

In a typical survey we get this satisfaction information from around 250 people.

We survey passengers every other weekend and report results every four weeks, combining two survey waves. Further details on how we carried out this survey are available on page 30.

This survey is also used to produce a report every six months showing satisfaction for each train operating company (where sample size allows).

Rail headlines

88% of rail passengers were satisfied with their journey overall

Satisfaction with the behaviour of other passengers has increased from 70% to 77%

Rail usage levels

Proportion using rail in last seven days over time

6 October 2023 report. Rail use is defined as having travelled by rail within seven days of being surveyed. Base size around 2000 per survey.

Methodology

Transport Focus's Rail User Survey runs every other weekend in Yonder Consulting's omnibus. In total approximately 2000 people per survey are screened to identify those who have made a rail journey (excluding London Underground) in the last seven days and the purpose of the journey. Users then answer questions about satisfaction with their journey. The total number of rail users we spoke to each week is shown in the table opposite with the dates of fieldwork. We report results every four weeks.

Yonder Consulting's omnibus is weighted to be nationally representative of the population of Great Britain. The analysis of satisfaction questions excludes those who say that the question is not applicable. The questions asked are on the next slide.

The omnibus survey asks questions about a variety of matters from a range of client organisations. Not all those interviewed through Yonder Consulting's omnibus are passengers on public transport. Numbers may not add up to 100 per cent, due to rounding.

	Fieldwork dates	Response numbers
Wave 79	28-30 April	310
Wave 80	12-14 May	279
Wave 81	26-28 May	293
Wave 82	9-11 June	253
Wave 83	23-25 June	341
Wave 84	7-9 July	268
Wave 85	21-23 July	268
Wave 86	4-6 August	271
Wave 87	18-20 Aug	266
Wave 88	1-3 Sept	251
Wave 89	15-17 Sept	333
Wave 90	29 Sept-1 Oct	267

Appendix: survey question text

Q. Individual satisfaction measures: Thinking about this most recent journey you made by train, how satisfied or dissatisfied were you with? Scale: Very satisfied to Very dissatisfied and Not applicable (except overall satisfaction).

- a. This train journey overall
- b. The information on how busy the train would be before travelling
- c. The cleanliness of the inside of the train
- d. Helpfulness and attitude of staff
- e. Overall satisfaction with the station
- f. Punctuality/reliability (i.e. the train departing / arriving on time)
- g. Frequency of the trains on that route
- h. Length of time the journey was scheduled to take
- i. Level of crowding on the train
- j. The behaviour of other passengers
- k. Provision of information during the journey
- l. Comfort of the seats
- m. Value for money of your ticket
- n. Reliability of the internet connection
- o. Overall satisfaction with the train
- p. Your personal security during your journey
