* Office of Rail and Road data (Jan - Mar 2024)

London Overground

Across the national network, passengers in the Rail User Survey are talking about...

"My return scheduled train was over an hour delayed. The only **information** given was 'delayed'. No reason why. No information for how long. Next train scheduled for an hour and no information about if that was running. Different staff told me different updates."

"Feel that **overcrowding** is now a huge issue and that companies do not put on enough carriages to cope with demand. Clearly some services are busier than others and this should be relatively predictable. With the price you pay for a ticket you would like a proper seat and although it's manageable when I'm travelling alone it is extremely stressful if I'm travelling with older relatives who actually need to sit."
